## MANDATORY MAINTENANCE

For this Warranty to apply, the Customer must retain certain records. For AMB to process a claim, we will need to be told the original coil or skid tag number. Also, to avoid build-up of dirt and debris, sand and salt residue accumulation, the building owner shall perform a "sweet water" / fresh tap water rinse twice a year in accordance with AAMA 6R10.1.1979. Further, additional maintenance is required immediately following a severe weather event, such as, a hurricane, tornado, hailstorm; damaging wind, rain, or snowstorm; extreme summer heat or winter cold; and a fire, vandalism; or after other trades or non-roofing trades have been on the roof for any reason. Detailed records together with copies of receipts and invoices must be kept of all maintenance.

Failure to conduct mandatory maintenance will void your perforation warranty.

Note: Before performing any surface maintenance, contact the Manufacturer/Fabricator of the Building Systems for assistance to ensure that you are using the proper techniques, procedures, products, chemicals, and materials.

If there is damage to a panel, the entire aluminum panel must be replaced.

Be certain that a detailed report of all work completed by the contractor is obtained.

## PERSONAL PROTECTION

Always comply with all safety guidelines whether customary, regulatory, or statutory. Failure to follow these regulations can result in serious injury or death. AMB is not responsible for any injury or death incurred to any individual while conducting building maintenance.**

When performing roof maintenance:

- Keep foot traffic to a minimum.
- Step only in the panel flat directly on or in close proximity to a supporting roof structural
- Do not step in or on gutters or the gutter hanging system.
- Do not step on or near skylights.
